

Dear Colleagues:

We are completing a meta-analytic review of the crowdfunding literature. This analysis will examine the nomological network of crowdfunding- both in terms of antecedents and consequences.

The coauthor team would greatly appreciate your help in locating data that is either unpublished or in-press. This includes student projects, conference presentations (abstracts, papers, posters), articles in-press, dissertations, and unpublished manuscripts.

Please email us any papers or data that you think might inform our review of the antecedents and consequences of crowdfunding. We may be reached at either bcdavis@vcu.edu or thomas.allison@wsu.edu.

Thank you in advance for your assistance.

Very Best Regards

Blakley C. Davis
